| Sl. No.         | Product Composition                                                                                                                                      | Pack Size                                  | Dosage Form                      | SKU | Indications                                                                                                       | Other                                                                                                                                                                | Therapeutic Area                         |
| 1               | Prucalopride succinate (INN); ATC A06AX05                                                                                                                | 28 tablets, 1 mg                           | Film-coated tablets              |     | Symptomatic treatment of chronic constipation in adults in whom laxatives fail to provide adequate relief         | Selective 5-HT4 agonist, gastrointestinal prokinetic; ESNM guideline: High evidence, 100% agreement, Strong recommendation; adult dose 2mg once daily                | Gastroenterology (Chronic Constipation)  |
| 2               | Prucalopride succinate (INN); ATC A06AX05                                                                                                                | 28 tablets, 2 mg                           | Film-coated tablets              |     | Symptomatic treatment of chronic constipation in adults in whom laxatives fail to provide adequate relief         | Selective 5-HT4 agonist, gastrointestinal prokinetic; ESNM guideline: High evidence, 100% agreement, Strong recommendation; adult dose 2mg once daily                | Gastroenterology (Chronic Constipation)  |
| 3               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 0.2 mg                                                                                           | 15 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Benfotiamine is lipophilic, superior absorption/bioavailability vs thiamine (~5-fold plasma levels, ~3.6x bioavailability)                                           | Nervous System (Peripheral Neuropathy)   |
| 4               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 0.2 mg                                                                                           | 20 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Benfotiamine is lipophilic, superior absorption/bioavailability vs thiamine (~5-fold plasma levels, ~3.6x bioavailability)                                           | Nervous System (Peripheral Neuropathy)   |
| 5               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 0.2 mg                                                                                           | 30 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Benfotiamine is lipophilic, superior absorption/bioavailability vs thiamine (~5-fold plasma levels, ~3.6x bioavailability)                                           | Nervous System (Peripheral Neuropathy)   |
| 6               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 0.2 mg                                                                                           | 60 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Benfotiamine is lipophilic, superior absorption/bioavailability vs thiamine (~5-fold plasma levels, ~3.6x bioavailability)                                           | Nervous System (Peripheral Neuropathy)   |
| 7               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 0.2 mg                                                                                           | 90 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Benfotiamine is lipophilic, superior absorption/bioavailability vs thiamine (~5-fold plasma levels, ~3.6x bioavailability)                                           | Nervous System (Peripheral Neuropathy)   |
| 8               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 1 mg                                                                                             | 15 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Stracke et al. 1996: benfotiamine+pyridoxine+cyanocobalamin combination showed 30% reduction in vibration perception threshold vs placebo in diabetic polyneuropathy | Nervous System (Diabetic Polyneuropathy) |
| 9               | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 1 mg                                                                                             | 20 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Stracke et al. 1996: benfotiamine+pyridoxine+cyanocobalamin combination showed 30% reduction in vibration perception threshold vs placebo in diabetic polyneuropathy | Nervous System (Diabetic Polyneuropathy) |
| 10              | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 1 mg                                                                                             | 30 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Stracke et al. 1996: benfotiamine+pyridoxine+cyanocobalamin combination showed 30% reduction in vibration perception threshold vs placebo in diabetic polyneuropathy | Nervous System (Diabetic Polyneuropathy) |
| 11              | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 1 mg                                                                                             | 60 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Stracke et al. 1996: benfotiamine+pyridoxine+cyanocobalamin combination showed 30% reduction in vibration perception threshold vs placebo in diabetic polyneuropathy | Nervous System (Diabetic Polyneuropathy) |
| 12              | Benfotiamine 150 mg / Pyridoxine 50 mg / Cyanocobalamin 1 mg                                                                                             | 90 tablets                                 | Film-coated tablets, oral route  |     | Systemic neurological disease (peripheral neuropathy) with demonstrated deficiency of vitamins B1, B6 and B12     | Stracke et al. 1996: benfotiamine+pyridoxine+cyanocobalamin combination showed 30% reduction in vibration perception threshold vs placebo in diabetic polyneuropathy | Nervous System (Diabetic Polyneuropathy) |
| 13              | Patented sonicated hyaluronic acid blend with targeted actives; preservative-free dual-syringe                                                           | Not specified (professional in-clinic use) | Dual-syringe mixed gel           |     | Professional post-procedure skincare to support skin recovery/comfort after chemical peels, lasers, microneedling | Very low cytotoxicity; soothes, hydrates, regenerates, brightens, strengthens skin barrier                                                                           | Skin and Wound Care (Cosmetics)          |
| 14              | Patented sonicated HA with PDRN, growth factor mimetics. Patented sonicated hyaluronic acid combined with innovative active ingredients (varies by item) | Not specified (professional in-vial)       | Single-dose sealed glass vial    |     | Advanced aesthetic and medical procedures: supports in-clinic                                                     | Eliminates dilution, minimizes contamination risk; produced in clean-room with steam                                                                                 | Skin and Wound Care (Cosmetics)          |
| 15              | Patented sonicated hyaluronic acid combined with innovative active ingredients (varies by item)                                                          | Not specified                              | Gel / cream / serum / mask / SPF |     | Home-care line extending professional aesthetic treatments; hydration, smoothing, revitalization                  | High bioavailability and skin tolerability; multi-molecular action                                                                                                   | Skin and Wound Care (Cosmetics)          |
| 16              | Patented sonicated hyaluronic acid combined with innovative active ingredients (varies by item)                                                          | Not specified                              | Gel / cream / serum / mask / SPF |     | Home-care line extending professional aesthetic treatments; hydration, smoothing, revitalization                  | High bioavailability and skin tolerability; multi-molecular action                                                                                                   | Skin and Wound Care (Cosmetics)          |
| 17              | Patented sonicated hyaluronic acid combined with innovative active ingredients (varies by item)                                                          | Not specified                              | Gel / cream / serum / mask / SPF |     | Home-care line extending professional aesthetic treatments; hydration, smoothing, revitalization                  | High bioavailability and skin tolerability; multi-molecular action                                                                                                   | Skin and Wound Care (Cosmetics)          |
| 18              | Patented sonicated hyaluronic acid combined with innovative active ingredients (varies by item)                                                          | Not specified                              | Gel / cream / serum / mask / SPF |     | Home-care line extending professional aesthetic treatments; hydration, smoothing, revitalization                  | High bioavailability and skin tolerability; multi-molecular action                                                                                                   | Skin and Wound Care (Cosmetics)          |
| 19              | Patented sonicated hyaluronic acid combined with innovative active ingredients (varies by item)                                                          | Not specified                              | Gel / cream / serum / mask / SPF |     | Home-care line extending professional aesthetic treatments; hydration, smoothing, revitalization                  | High bioavailability and skin tolerability; multi-molecular action                                                                                                   | Skin and Wound Care (Cosmetics)          |

| 4               | Hypochlorous acid (HOCl) 0.016% | 500 ml bottle, trigger spray/screw cap  | Hydrogel and liquid spray              | 500ML  | Cleansing/debriding wounds and preventing infection; minor skin abrasions, lacerations, irritations, minor cuts/burns, intact skin; wound irrigation; moistening/loosening dressings; flushing malodour irritants; helps prevent biofilm | CE marked; skin-friendly pH, hygienically clean, hypoallergenic, non-irritant, dermatologically tested, alcohol-free; >2,600 peer-reviewed publications on HOCl antimicrobial efficacy | Skin and Wound Care                            |
| 5               | Hypochlorous acid (HOCl) 0.016% | 1000 ml bottle, trigger spray/screw cap | Hydrogel and liquid spray              | 1000ML | Cleansing/debriding wounds and preventing infection; minor skin abrasions, lacerations, irritations, minor cuts/burns, intact skin; wound irrigation; moistening/loosening dressings; flushing malodour irritants; helps prevent biofilm | CE marked; skin-friendly pH, hygienically clean, hypoallergenic, non-irritant, dermatologically tested, alcohol-free; >2,600 peer-reviewed publications on HOCl antimicrobial efficacy | Skin and Wound Care                            |
| 6               | 18 mg/ml HA BDDE cross-linked   | 1 prefilled syringe                     | Injectable gel, prefilled syringe      | 18MG   | Dermal filling for different anatomical areas: fine lines, lip augmentation, volumizing, lifting                                                                                                                                         | Class III medical device, EU MDR 2017/745; high elasticity, high skin compatibility/biocompatibility, minimum risk of side effects, natural/smooth tissue feel                         | Skin and Wound Care (Aesthetics/Fillers)       |
| 7               | 22 mg/ml HA BDDE cross-linked   | 1 prefilled syringe                     | Injectable gel, prefilled syringe      | 22MG   | Dermal filling for different anatomical areas: fine lines, lip augmentation, volumizing, lifting                                                                                                                                         | Class III medical device, EU MDR 2017/745; high elasticity, high skin compatibility/biocompatibility, minimum risk of side effects, natural/smooth tissue feel                         | Skin and Wound Care (Aesthetics/Fillers)       |
| 8               | 24 mg/ml HA BDDE cross-linked   | 1 prefilled syringe                     | Injectable gel, prefilled syringe      | 24MG   | Dermal filling for different anatomical areas: fine lines, lip augmentation, volumizing, lifting                                                                                                                                         | Class III medical device, EU MDR 2017/745; high elasticity, high skin compatibility/biocompatibility, minimum risk of side effects, natural/smooth tissue feel                         | Skin and Wound Care (Aesthetics/Fillers)       |
| 9               | 26 mg/ml HA BDDE cross-linked   | 1 prefilled syringe                     | Injectable gel, prefilled syringe      | 26MG   | Dermal filling for different anatomical areas: fine lines, lip augmentation, volumizing, lifting                                                                                                                                         | Class III medical device, EU MDR 2017/745; high elasticity, high skin compatibility/biocompatibility, minimum risk of side effects, natural/smooth tissue feel                         | Skin and Wound Care (Aesthetics/Fillers)       |
| 10              | 28 mg/ml HA BDDE cross-linked   | 1 prefilled syringe                     | Injectable gel, prefilled syringe      | 28MG   | Dermal filling for different anatomical areas: fine lines, lip augmentation, volumizing, lifting                                                                                                                                         | Class III medical device, EU MDR 2017/745; high elasticity, high skin compatibility/biocompatibility, minimum risk of side effects, natural/smooth tissue feel                         | Skin and Wound Care (Aesthetics/Fillers)       |
| 11              | Linear HA, 20 mg/2 ml           | 1 prefilled syringe, 2 ml               | Injectable solution, prefilled syringe | 20MG   | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility                                                                                                       | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                                                                     | Pain Relief (Orthopedics/Viscosupplementation) |

|    |                                                                                                                                  |                             |                                        |          |                                                                                                                                    |                                                                                                                                     |                                                |
|----|----------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------------------------------------|----------|------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| 12 | Linear HA, 32 mg/2 ml                                                                                                            | 1 prefilled syringe, 2 ml   | Injectable solution, prefilled syringe | 32MG     | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 13 | Linear HA, 40 mg/2 ml                                                                                                            | 1 prefilled syringe, 2 ml   | Injectable solution, prefilled syringe | 40MG     | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 14 | Linear HA, 48 mg/2 ml                                                                                                            | 1 prefilled syringe, 2 ml   | Injectable solution, prefilled syringe | 48MG     | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 15 | Cross-linked HA, 60 mg/2 ml                                                                                                      | 1 prefilled syringe, 2 ml   | Injectable solution, prefilled syringe | 60MG-2ML | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 16 | Cross-linked HA, 60 mg/3 ml                                                                                                      | 1 prefilled syringe, 3 ml   | Injectable solution, prefilled syringe | 60MG-3ML | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 17 | Cross-linked HA, 72 mg/3 ml                                                                                                      | 1 prefilled syringe, 3 ml   | Injectable solution, prefilled syringe | 72MG     | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 18 | Cross-linked HA, 90 mg/3 ml                                                                                                      | 1 prefilled syringe, 3 ml   | Injectable solution, prefilled syringe | 90MG     | Substitute of synovial fluid in joints affected by degenerative or mechanical osteoarthritis (OA) causing pain or reduced mobility | Highly purified, sterile, non-pyrogenic, non-animal origin; cross-linked HA longer-lasting/more stable than linear                  | Pain Relief (Orthopedics/Viscosupplementation) |
| 19 | Olive oil, Lavender oil, Vitamin E, Rosemary extract, St. John's Wort extract, Mullein extract, Pot marigold extract, Garlic oil | 7 ml bottle                 | Spray ear drops                        | 7ML      | Otitis media, otitis externa, ear pain, removal of excess ear wax (cerumen)                                                        | Class II medical device; natural ingredients only, suitable for children and adults; 474 children studied across 3 clinical studies | Pediatric / ENT                                |
| 20 | Hypochlorous acid (HOCl) 0.016%                                                                                                  | 60 ml bottle, finger spray  | Hydrogel and liquid spray              | 60ML     | Cleans, protects and prevents nappy rash (diaper dermatitis) in children                                                           | Hygienically clean, skin-friendly pH, alcohol-free, dermatologically tested, hypoallergenic, non-irritant, suitable from day 1      | Pediatric                                      |
| 21 | Hypochlorous acid (HOCl) 0.016%                                                                                                  | 150 ml bottle, finger spray | Hydrogel and liquid spray              | 150ML    | Cleans, protects and prevents nappy rash (diaper dermatitis) in children                                                           | Hygienically clean, skin-friendly pH, alcohol-free, dermatologically tested, hypoallergenic, non-irritant, suitable from day 1      | Pediatric                                      |
| 22 | Hypochlorous acid (HOCl) 0.016%                                                                                                  | 250 ml bottle, finger spray | Hydrogel and liquid spray              | 250ML    | Cleans, protects and prevents nappy rash (diaper dermatitis) in children                                                           | Hygienically clean, skin-friendly pH, alcohol-free, dermatologically tested, hypoallergenic, non-irritant, suitable from day 1      | Pediatric                                      |
